DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-48, drawn to a wristphone with a phone module and a watch module, classified in class 455, subclass 556.
 - II. Claims 49-70, drawn more towards a carriage/housing for a communication apparatus, classified in class 455, subclass 575.
 - III. Claims 71-75, drawn to a wristband strap, classified in class 224, subclass 219.
2. Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particulars of group II and III does not require for the system of I. The subcombination has separate utility such as a communication apparatus having a carriage unit, or a wristband operable for holding a communication apparatus.

Art Unit: 2683

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to David Carstein on 7/27/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
